

ADMISSIONS OPEN FOR 2026

ABOUT US

Tosa Girls' Junior and Senior High School is a 120-year-old private girls' school located in Kochi Prefecture, Japan. By following the school's educational philosophy of "Clarity, Wisdom, Affection, and Grace", we have nurtured generations of outstanding women with new-age thinking.

OUR FACILITIES

Located in the city center, we provide students with an excellent learning environment. Modern school buildings, a large playground, a gymnasium, a swimming pool, and other facilities are available.

OUR EDUCATION SPECIALIES

HIGH QUALITY EDUCATION

We focus on quality education. Here students develop a sense of self-affirmation, the ability to think, to communicate and to adapt. Teachers provide one-on-one tuition according to the different goals and characteristics of the students.

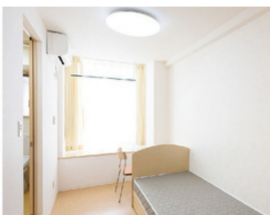

JAPANESE CULTURE STUDY

In addition to the basic curriculum, we emphasize Japanese culture education. Students learn about tea ceremony, flower arrangement, calligraphy, and kimono, which will help them to grow a focused mind and develop elegant etiquette.

FOR FOREIGN STUDENTS

We provide safe and comfortable living conditions for foreign students. Every student has a single-room dorm with a private bathroom. The dormitory cafeteria provides meals. Students can walk to school in 10 minutes. We also offer special programs to help students integrate into Japanese life as soon as possible such as language learning assistance & culture classes.

EXTRA-CURRICULAR ACTIVITIES

Students can join clubs based on their interests. There are various clubs such as dance, cheerleading, chorus, calligraphy and athletics. Students regularly participate in national competitions and have received excellent results. In addition, we offer international cultural events, study trips, and other activities to enrich school life.

FURTHER EDUCATION OPPORTUNITIES

We maintain excellent relationships with many of Japan's leading universities and colleges, offering a wide selection of designated universities to meet student's individual goals. This helps alleviate the pressure of university entrance exams when students are considering their future.
